

**VI/6723/92
(PVET/EN/1706)**

**CONTINGENCY PLANS FOR THE CONTROL OF
FOOT AND MOUTH DISEASE**

**SUMMARY OF MEMBER STATES PLANS
AS AT JANUARY 1993**

(PVET/EN/1706-25)

BELGIUM

1. Legal Powers. - These cover:

- Notification of suspicion
- Control of movements
- Slaughter, destruction and sanitation
- vaccination (as determined by the Minister)

2. Finance - Allocations for:

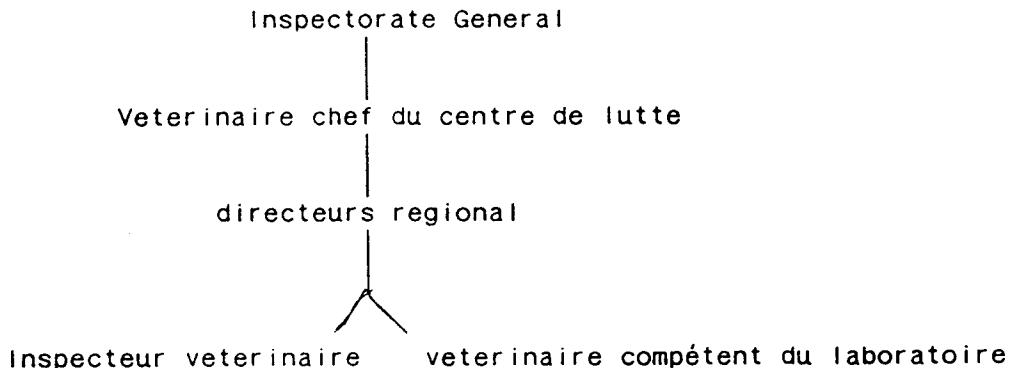

- Personnel
- temporary agents

N.B. Funding is through government funds and charges on sectors

- small equipment and consumables
- slaughter, destruction and sanitation
- compensation (50% within 30 days, 50% within 90 days)

Government credits for FMD are limited; supplementing allocations are subject to ministerial agreement

3. Chain of Command

4. Disease control centres

- the national centre (centre national de lutte) (see Annex 1) is assisted by a national crisis centre set up by the Ministry of the Interior so as to coordinate the actions with other departments and local authorities.
there are four veterinarians (supplemented in an emergency by further veterinarians and administrative assistants)
- the local centres (8) (see Annex 2)
In the event of an outbreak the inspecteur vétérinaire will be chosen (by the national centre) from among the local inspectors in the affected province. He will be assisted by a team consisting of:
 - a veterinarian
 - at least one technician.

The coordinating inspecteur vétérinaire acts for the regional director. In 'peace time' there are 2 such coordinators in Belgium (Flanders and Wallonia).

5. Expert groups (Equipes Epidemiologiques)

~~32~~ ~~26~~ sanitary teams, each composed of a veterinarian and a technician will conduct epidemiological enquiries. They are added by veterinarians from one of the 8 provincial laboratories.

In 'peace-time' these teams will conduct enquiries into tuberculosis, brucellosis and other diseases.

In case of an outbreak of epidemic disease, they will be mobilised by the national centre. They will be provided with help by the meteorological office.

6. Personnel resources

In case of need the national centre would call for volunteer veterinarians on contract. The centre has a list of interested veterinarians detailing their training, their experience of disease outbreaks and their knowledge of languages.

The national centre also has available to it a list of veterinarians in the public health centre who can help.

7. Equipment (dealt with under local centre arrangements)

8. Standing instructions

Inspections for dealing with outbreaks of FMD are in preparation based on the instructions for CSF.

9. Diagnostic laboratory - UN.R.V. see Annex I

10 Vaccination plans

The Belgian bank has a stock of 1 million doses of trivalent (A,O,C) vaccine. It is envisaged that a private firm will be asked to contract to furnish vaccine. A vaccination plan is being elaborated.

11 Training

Two training course for veterinary inspectors

- Dutch (prof. Pensaert)
- French (Prof. Pastoret).

12 Publicity/Awareness

- Stock owners and dealers - a brochure on FMD prepared by the universities of Ghent and Liege in cooperation with the Ministry.
 - Practicing veterinarians - annual courses and demonstrations at the two veterinary facilities
 - Information meetings arranged by the Veterinary team
 - Press articles
 - Sanitation exercises prepared by the national centre and carried out at the local centres.
-

CENTRES DE LUTTE

... CENTRE LOCAL

CENTRE NATIONAL

ANNEXE 3 : ORGANIGRAMME DES CENTRES

(PVET/EN/1706-7)

DENMARK

1. LEGAL POWERS – Notification

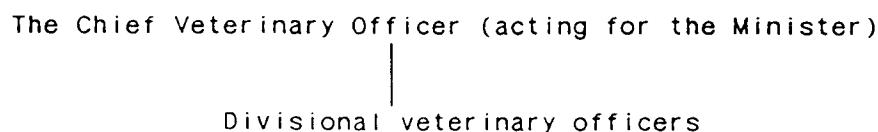

- Movement control
- Slaughter, destruction and sanitation
- Vaccination

There is no legal power to invoke police aid but the veterinary service works in close cooperation with the police and other civil authorities

2. FINANCE – The government allocates money for:

- Personnel and equipment
- Extra personnel – supplementary finance act
- Slaughter, destruction and sanitation
- Compensation (stock values + loss of income) (payment within a month)
- Emergency vaccination

3. CHAIN OF COMMAND

4. DISEASE CONTROL CENTRES

The national centre is at veterinary service H.Q. (Copenhagen) (see Annex 1)

There are 12 local disease control centres: in the event of disease temporary centres may be set up.

Each local office now has two veterinarians and office support

5. EXPERT GROUPS

Expert groups will be established as the need arises. They will consist of:

- 1 or more senior veterinarians
- 1 laboratory scientist (from Lindholm)
- the D.V.O. covering the affected area
- 1-2 veterinarians
- 3 vet pathologists trained in ageing lesions

The expert groups will be mobilised by the national centre and their functions will be to:

- assess origin of disease and holdings at risk
- deal with particular problems
- advise on disposal of carcases
- liaise with meteorological office

6. Personnel resources

- In an emergency situation duties would be handled by:
 - Head office (22)
 - District veterinary officers and their assistants (24)
- There are 1100 general practitioners in Denmark who would not be directly involved unless there was emergency vaccination
- Veterinarians employed in animal health programmes (Pig producers and dairy board) would be made available.

It is estimated that there are sufficient staff available to deal with 15 outbreaks

7. EQUIPMENT

- Clothing and other minor equipment held by DVO's
- Major equipment on contract from a national company

8. STANDING INSTRUCTIONS

- Last revised 1990, to be updated 1992

9. DIAGNOSTIC LABORATORY - LINDHOLM (see Annex I)

10. VACCINATION PLANS

- National vaccine bank of 800,000 doses (150,000 doses ready to use)
- Future drawing rights from Community bank

Anticipated requirements - 400,000 doses

11. TRAINING

- All veterinarians are given a one-day course
- Expert staff trained at Commission course

12. PUBLICITY/AWARENESS

- Lectures at the veterinary school
 - agricultural schools
 - local veterinary associations
 - farmer associations

THE DANISH COUNTIES.

(PVET/EN/1706-10)

GERMANY

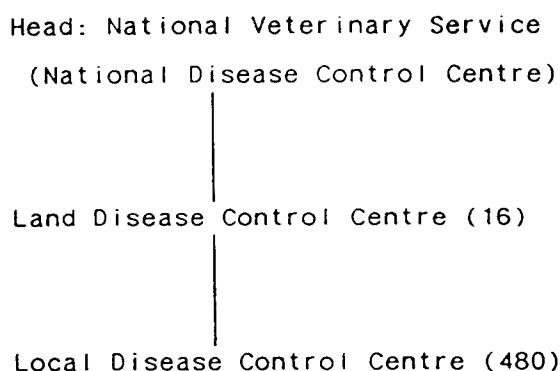

1. Legal powers

- Notification
- Slaughter, Destruction and Sanitation
- Compensation
- Movement control
- Police aid (under Land regulations)
- Vaccination

2. Finance

- Veterinary Running Costs : Cover Staff and Consumables
- Animal disease insurance schemes: These cover slaughter and disposal, sanitation and compensation (Paid within 3-4 weeks)

3. CHAIN OF COMMAND:

The Head of the National Veterinary service coordinates measures (in liaison with the Länder) and ensures the requisite support from organisations at Federal level. If appropriate he proposes further measures on the basis of the animal disease law. He is responsible for informing the Commission, International and national organisations and the media.

If an outbreak of FMD occurs a full-time office will be set up. Within the Ministry of Agriculture (the land authorities must inform the national authorities immediately and thereafter report regularly).

The Länder are responsible for the execution of FMD controls. Each land has a disease control centre which manages and supervises the local disease control centres (these come under the president of the administrative district and municipality).

4. Land Disease Control Centres (16)

Location: at each land office of the Ministry

Staffing: veterinarians (3 on average) and support staff (no details)
Equipment: 24 hr access by telex/fax

Responsibilities:

- a) guaranteeing readiness for an outbreak of disease
- b) for emergency control in the event of disease outbreak
 - delination of protection & surveillance zone
(in conjunction with the local areas. If there is a dispute the case goes to the Federal Minister)
 - authorisation for the release of vaccines and delination of vaccination areas. The land proposes the vaccination areas, the Federal authorities agree in conjunction with the Commission.

5. Expert Groups

In the event of an outbreak an expert group will be set up. It will be led by staff from Tübingen (Rhiems/Westerhausen) and includes:

Veterinarians with field experience of disease control
Epidemiologists
Laboratory staff

6. Personnel resources

- There are 1800 veterinarians at Kreis level.

7. Equipment & Other Resources

- Held at the local veterinary offices

8. Standing instructions

These consist of:

- regulations (prepared by the head of the National Service and included in plan)
- detailed practical advice
- instructions on taking samples (prepared by Tübingen and included in plan)

9. Diagnostic Laboratories

BFAV facilities at Tübingen and Fli Insel Riems.

10. Emergency Vaccination

Vaccine supplies for the federal länder are held at the Bayer Company, Cologne. Supplies for the new länder are held at Riems (until 31-12-91). One million doses of each virus type are required.

Vaccination carried out after consultation with the Commission.

11.Training

The expert veterinary staff (8) will be trained at Commission courses. The laboratory staff (4) will be trained at Pirbright.
All veterinarians must attend regular refresher courses and these will now include CSF/ASF as well as FMD.

12.Publicity/disease awareness

GREECE

1. Legal powers
 - Notification
 - Slaughter
 - Destruction
 - Compensation
 - Sanitation
 - Movement control
 - Vaccination
 - Police aid (on written demand)
2. Finance
 - Personnel + travel costs - Normal Budget
 - Equipment - " "
 - Slaughter & sanitation - (costs covered after a decision of the committee of prices + income)
 - Compensation -
(Payment via agricultural bank of Greece.
Takes 25 days post-slaughter)
 - Vaccination - min. of ag. budget

National disease control centre -

Location: Athens (Vet. H.Q.) (see Annex 1)
Staff: 4 Vets, 5 support staff
Equipment: Tel/Fax + Telex available 24 hrs.

4. Local disease control centres - 51 Centres

(list and maps submitted)
I/C - Div. Vet. Officer
Staff - 2-4 veterinarians
2-4 support staff for field duties
2-3 office staff

Police - Nominate infected premises, restrict movements
Local authorities - close markets and
abattoirs
Local Agric. + Vet. Services - pay compensation

5. Expert groups -

One group has been set up at the General Veterinary Service HQ
It consists of 6 veterinarians trained in FMD and in the
field of other infectious diseases

Composition of groups - 1 Senior veterinarian
with experience of FMD)
1-2 veterinarians(including
an expert in sanitation
and disposal of carcases
1 diagnostic lab. staff member
meteorologist

Group has equipment with sampling equipment for 300 animals
and mobile telephone

The expert group will conduct training courses

6. Personnel Resources

NDDC maintains list of staff available - 985 veterinarians,
502 veterinary assistants

7. Equipment-held at LDCC

8. Standing instructions

Copy attached, last review 1991

9. Diagnostic laboratories

Institute of FMD + exotic diseases
ATTIKI (see Annex 1)
specimens can be delivered within 8 hrs.

10. Emergency vaccination

Greece requires-

- A,O,C, Trivalent European strain (200,000 doses)
- O,A22 Bivalent Middle East strain (" ")

It has no vaccine in stock at the moment

Cold chain facilities are being established
(isothermal boxes)

11. Training programmes

All veterinarians joining the service attend seminars. Refresher training programme for all vets during last 2 years

- Local training for office + field support staff
(details given)

NDCC staff - refresher course + simulation coverage once a year

12. Publicity/disease awareness

Lecture/demonstration each year at Thessaloniki Veterinary School
Lecture/demonstration to local agricultural organisations once a year.

Lectures + Films. In the municipalities or communities twice a year.

SPAIN

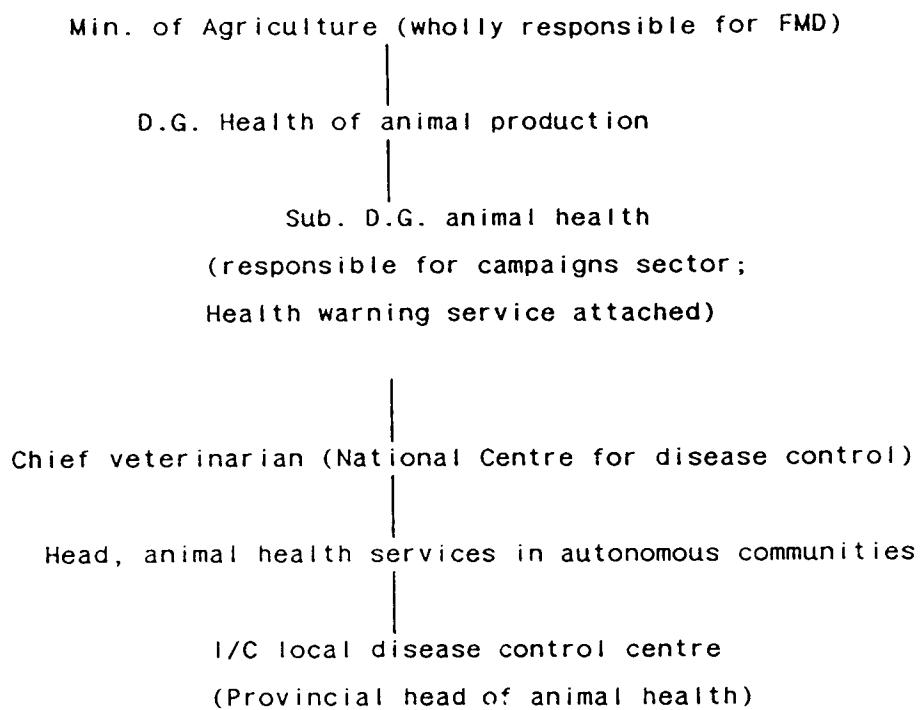

The Spanish plan has been drawn up by the Director-General for the health of agricultural production acting through the sub directorate for animal health in coordination with the animal health service of the autonomous communities.

1. Legal powers
 - Notification, visits + checks
 - Official declaration of an out break
 - Slaughter of animals suspected of being infected
 - Compensation (payment in 30 days)
 - Destruction of carcases
 - Immobilisation

The law on epizootics ensures movement controls and police aid

2. Financial Resources
 - Personnel (+ operational outlay + subsistence allowance, etc.)
Paid for by annual budget of Min. of Agriculture together with budgetary allocations from the competent depts. of agriculture in autonomous communities
 - Warning System has an allocation of 65m.pts. for equipment and training (1992)
 - Compensation
Sub.div. of animal health allocates 6975m. pts (1992). Of this amount 100 m. pts. is for FMD. Compensation arranged by autonomous communities (a.c.)
 - Equipment. Budget with sub. Director-General animal health (1253 m. pts (1992))
 - Emergency vaccination charged to budgets of autonomous communities

3. Chain of Command

National disease control centre - at Madrid (see Annex 1)

Staff: 3 Veterinarians, 2 auxiliary agents

The task of the Centre include:

- notify Commission of outbreaks
- collect disease information from third countries
- maintain list of local centres
- set up expert groups
- draft emergency plans
- control strategy (in conjunction with autonomous communities)

4. Local disease control centres - 49 Centres

(list provided at Annex 2)

These are dependent on the Animal Health Service of each of the 10 autonomous communities
Temporary centres may be set up.

The officer in charge will after consultation with the national centre

- declare an infected holding
- arrange slaughter
- advise the national centre on the establishment of protection and surveillance zones

Staff - 3-6 veterinarians
5 livestock auxiliaries
6 administrative auxiliaries

5. Expert groups -

Two teams have been set up by National Centre. They consist of national centre staff and experienced professionals

In times of emergency a crisis cabinet will be set up

Tasks of groups - direct epidemiological enquiry
- liaise with national centre
- advise on sanitation, etc.
- provide training

6. Resources - personnel

A list of staff is being drawn up (including qualifications)

7. Resources - Equipment

Most at local centres (Also agreements with suppliers)

Supplementary equipment at the disposal of national centre

8. Standing instructions

Royal decree transposing 90/423/EEC into Spanish law sets out all the required measures.

A manual on foot and mouth disease control is on the final stages of preparation.

9. Laboratories responsible for diagnosis

- Algete (Madrid)
 - Valdeolmos (Madrid)
- (see Annex I)

10. Emergency Vaccination: The vaccine bank consists of:

- 229,900 doses of ruminant vaccine from Laboratorios Hipra (at Gerona)
- <u>262,330</u> " " " " " Cooper-Zelta (at Pontevedra)
Total 492,320 " " " " "
- 453,490 doses of pig vaccine from Hipra (at Gerona)
- <u>530,000</u> " " " " " Cooper-Zelta (at Pontevedra)
Total 983,490 doses of pig vaccine

FMD Antigen:

- 1,514,156 doses (at Gerona and Pontevedra)

The organisation of a vaccination programme is being worked out and will be communicated to the Commission.

When FMD has been confirmed, decisions on vaccination will be taken only after consultation with the Commission.

11. Training

The responsibility of the national centre and experts
Two courses have been organised for each autonomous community and these people will arrange training for each local centre

1992 - 40 Veterinarians trained. - Retraining each year by means of a simulation exercise

12. Disease awareness

- Veterinary schools - 1 lecture annually
- Practising Veterinarians - talks and articles
- Farmers - articles in agriculture press
